

Responses to Council Questions and Comments

11/04/2024

Item #3: Resolution Accepting Completion of the Pavement Restoration & Reconstruction – Maria Drive (C16102432) and the Urban Recycled Water System Expansion – Maria Extension/Loop (C66501834) by Azul Works, Inc.

- **Question:** Maria Drive – paving over 50 yr old; what is design life (15 yr)? When will Council see the Recycled Water Master Plan?
 - **Response:** The City's updated Recycled Water Master Plan is part of the Integrated Water Master Planning effort that is underway and planned for completion in early 2025. In regard to paving design life we would expect 15 years before any major resurfacing would be required and 25 years for deeper structural rehabilitation.
- **Question:** When is Rainier going to be finished with stripping, since Maria is completed?
 - **Response:** Rainier striping is anticipated to be complete in Summer 2025, as part of the Rainier Pavement Rehabilitation project.
