Please view this short video.

**Poisoning The Climate Soup** by Tony Heller  
<https://youtu.be/hqgRtaWKuLY>

New content is posted daily at <https://www.youtube.com/@TonyHeller/videos>

The video, above, explains how a US Government agencies (NASA/NOAA) simply tamper with temperature data (homogenizing readings from urban heat islands with readings from rural areas) to create the desired government narrative: transforming **actual cooling trends** into a fake warming trends.

Please base local policy on accurate, scientific temperature readings, not tampered temperature readings or unreliable temperature rise projections.

Please consider adjusting the Cornerstone Action Items for the Blueprint for Carbon Neutrality for the Petaluma General plan by focusing only on the highest priority, most cost-effective items that reflect direct City of Petaluma actions and **provide guidance and education (without expensive requirements)** for Petaluma resident actions.

Thank you.
