Item #4: Resolution Ordering the Summary of Vacation of Public Water Line Easements at 495 North McDowell Boulevard on Assessor Parcel Number 007-380-038

- **Question:** Is this the line that would be used to service any development going to future development at the dog park or go under the 101 overpass to serve something in the future greenway (public restroom for example)? Will the new easement do this? Is there a water line already under the Rainier extension to do this service?
 - **Response:** The replacement water mains installed only service the new apartment development, as was originally intended. They do not serve future potential developments to the west. The replacement mains form a loop with the same intent of the old alignment to connect Rainier and North McDowell to provide water to the Deer Creek Apartment Development. The new easements will only reflect the new mains installed as approved in 2019. The dog park has an existing small water service from the Deer Creek development on the south side of Deer Creek to provide water to a drinking fountain. There is no existing water main under Highway 101 at Rainier Ave.
