Mayor and City Council members,

I am asking that you continue to get the publics' opinion and input concerning parking when planning new builds such as apartments and hotels etc.

Neighborhood and local suggestions and recommendations are valuable and vital. Locals know what is going on in their vicinity. Often the developers make decisions in their own best interest, not taking into consideration how it will impact those who live where these projects are being built.

These decisions need to be made on a local, neighborhood level. Please do not eliminate public hearings involving parking and other community related projects.

Thank you,  
Ron and Cyndi Maddalena
