Hello City Council Members,

I respectfully request that you seriously consider appointing the following individuals for GPAC:

Hal Bohner
Ron Chestnut
Brent Newell

All have professional experience with environment, urban planning, land use, as well as county-city government .

Hoping, once and for all , they will give the GPAC the expertise that is needed.

Historically, they have made many contributions to our community.

Builsing in this town has gotten out of control and without the proper infrastructure to balance it.

Please place these strong individuals with the high skill set and experience they have. Not developers or techies that have their own individual agenda and opportunity to personally gain.

We need to have the best future possible for this small town we call home .

Thank you-
Lia Economopoulos
