A previous questioner/commentator asked: 1") Who drafted the Survey; and 2) Did any community groups help in the drafting and if so which?" However, no answer was evidently given. I and other landlords would also like answers to those questions and additionally these:

- a) Who tabulated the Survey results?
- b) Were they tabulated in 'real time' (i.e. tabulated as they came in) or was all tabulation done only after the deadline?
- c) Who determined to extend the deadline and when was that decision made?

I and others will await your answers and the Survey results prior to determining if greater investigation into the process is warranted.
