Dear City Council members—

I urge you to place a hold on the 2007-crafted plan to install "forever chemical" ("PFAS") plastic sports turf at East Washington and Lucchesi Parks. These projects were initiated some time ago -- but the plastic grass has not yet gone in. Please stop and reevaluate. We need to re-think this old plan given recent science and multi-million-dollar lawsuits being filed due to PFAS serious public health and environmental damages.

Thank you,
Suzanne Clarke
