**Subject:** This Wed 1PM - Top Legal Experts explain Cell Tower law - Petaluma's hands are not tied!

---Warning: Use caution before clicking any attachments. THIS EMAIL IS FROM OUTSIDE OUR EMAIL SYSTEM.---

Petaluma does not have to continue forsake of our legal rights. Our hands are not tied, as Telecom Law Firm asserts.

**Please attend this webinar to learn the truth and protect Petaluma from continued over-proliferation of Cell Towers. Staff has been approving them without asking for proof they are needed (e.g., Drive Test, Dropped Call Logs) as part of Cell Tower Developers' permit applications. Why? This is the right of cities per Federal law.**

Please pre-register and attend per link below.

City does not have to keep approving all these Cell Tower Developer permits. **Especially when we are not keeping stock of where they are, whether their energy draw and radiation are violating their permitted levels (fire hazard), and whether they are even needed or are just an 'infrastructure grab' by carriers and property owners to capture rent.**

Please prioritize Petalumans over property owner, Cell Tower Developer, and telecom corporate greed.

Thank you,  
Taryn
