Thank you for adding the Skate Park item to the agenda. The staff reports indicates that the actual presentation will be attached: "Skatepark Presentation to Council (will be published on 3/30/2023)"

I don't see the presentation as of 8AM this morning (Monday April 3) and the meeting is this evening. It would be super helpful to get these presentations in advance of the meeting so the public can be prepared.

I would like for the presenter and Council to discuss specific, actionable plans for funding the work to implement the project. If there will be fundraising to close the gap needed for a successful project - what are the options for getting the money? Who is the team who will work on securing these funds? When will this work start? What fundings sources will you target first? If some of the funding will come from grants, what are those grants and what are the deadlines for submission?

Thank you,

Eric Leland
