Dear Commissioners & Council Liaison,

I am writing on behalf of 350 Petaluma. We urge you to recommend that the City of Petaluma NOT certify the Initial Study -- Mitigated Negative Declaration. It does not meet the requirements of the California Environmental Quality Act (CEQA).

This project has the potential for significant environmental effects, such as flooding and sewage overflows, necessitating CEQA review at this sensitive site. If not here, where?

Respectfully,

Annie Stuart
Steering Committee Member
350 Petaluma
