As an avid exerciser and father of three active kids, having a safe playing field is essential in Petaluma. The past few years I have found it to be more and more challenging to find a safe and playable surface for a multitude of activities. The gophers have taken over our fields and honestly it's extremely dangerous the number of holes our fields have. I don't blame the city for this - I just hope they consider other surfaces for the future and safety of our active citizens - both young and old.

Thank you,
Josh Evans
