Dear City Council -- please ensure dredging along Payran Flood Wall is included in City Budget tonight.

Northern Petaluma River, just south of Flood Weir has never been dredged and presents the highest ROI for dredging \$ per lives and property loss potential. The River up here suffers diminished capacity because it is significantly silted in.

Thank you,  
Taryn

**Subject:** Dredging problem along Flood Wall

In tonight's budget presentation, it was incorrectly reported dredging the entire River has been completed.

That is not true.

I have sent repeatedly photos of Rkver and storm out-drains there stilted in, greatly reducing capacity where it is needed most in storms.

The safety of the Payran neighborhood lives and property should be more important than watersports recreation/tourism.

Please prioritize protecting the neglected Payran Flood Wall segment of the River.

Thank you,  
Taryn
