LOS Petaluma D Street Quick Build.pdf

---Warning: Use caution before clicking any attachments. THIS EMAIL IS FROM OUTSIDE OUR EMAIL SYSTEM.---

Dear Mayor McDonnell and Councilmembers:

The Sonoma County Bicycle Coalition supports Petaluma's plan for a quick-build project on D Street that includes bike lanes and traffic calming measures. We will always prefer buffered or protected bike lanes for the greatest safety to the most vulnerable riders; however the staff recommendation with Class II lanes and parking on just one side is a significant improvement to the current configuration. D Street is an important link between the city, the country and the coast, and it is critical that it reflect a Complete Streets design that considers not just residents, but all potential users – pedestrians, bicyclists and vehicles.

Bicyclists on D Street are currently meant to share a minimal "bike lane" with parked cars, or ride in the vehicle travel lane. Designated bike lanes would be clearer and safer for bicyclists and drivers. This is not only an important step in encouraging more bicyclists to use the route, it is keeping in line with the City Council's stated priority of building safer streets for all.

As an extension of this quick build, SCBC would ask that the city consider any additional traffic calming measures necessary to ensure vehicle speeds of 25 mph on D Street.

We know there has been opposition from residents who are concerned about the loss of parking this project would involve. We commend the city for demonstrating that existing parking is only used about 14 percent of the time. Arguments that the city needs to maintain parking for use during Butter and Eggs Days and other once-a-year events are shortsighted and do nothing to encourage mode shift, a critical element in achieving the city's ambitious greenhouse gas-reduction goals.

Sincerely,

Eris Weaver, Executive Director Sonoma County Bicycle Coalition eris@bikesonoma.org 707-545-0153 office • 707-338-8589 cell www.bikesonoma.org
