Please share the status of resuming Zoom meeting access for Commission and Committee meetings.

The City of Petaluma is not providing a needed public service so members of the public can virtually attend meetings.

You have a responsibility post the COVID pandemic to understand changes in our society and adapt to those to serve voters and residents who desire to participate in the public process.

This request also directly relates to equity and to encouraging participation in the public process and providing a means to do so.

The City of Petaluma is failing in both of these areas.

Please prioritize and give direction to the City Manager to resume Zoom meeting access now for Commission and Committee meetings.

Thank you.

Susan Kirks
Petaluma

P.S. The report we recently heard about resuming this service sometime in the coming year is unacceptable.
