I have 6 questions regarding the renderings, elevation drawings and garbage management for the Hotel Weaver. If these details are in the proposal, I apologize for having overlooked them.

1. Will the building have electric powered fans and ventilation openings on the ground level? I don't see any in the renderings or elevation drawings.

2. Will any of the utility doors along B Street have vents in them (they are all show as solid doors in the renderings and elevation drawings)?
3. Will dumpsters be rolled out onto B Street for trash, recycling and composting pick up? If so, how often weekly?
4. Will parallel parking spaces be removed on B Street and/or Petaluma Blvd South for loading zones, and/or dumpster zones? The renderings are unclear regarding this.
5. Will the traffic signal at the corner be removed, as illustrated in the renderings?
6. Will the trash cans on the sidewalk be removed as illustrated in the renderings?

Thank you.
