Mayor, Vice Mayor and Councilmembers,

Re the second reading of the ordinance authorizing the lease for police department equipment storage, I know the lease is a done deal but hope the City will require the police department to update its AB 481 annual report. The current projected costs for fiscal year 2024 for maintenance and replacement of military equipment is \$67,900. If these costs include storage, the \$120K or at least the part of it used for storage of all the equipment listed in the report should be added. If these costs do not include storage, the report is missing pertinent information as AB 481 – section 7072(a)(4) requires the police department to include in its annual costs “transportation, maintenance, storage, upgrades and other ongoing costs.”

Thank you for your consideration,

Ellen Obstler
